In *War, Wine, and Taxes*, John Nye debunks the myth that Britain was a free-trade nation during and after the industrial revolution, by revealing how the British used tariffs--notably on French wine--as a mercantilist tool to politically weaken France and to respond to pressure from local brewers and others. The book reveals that Britain did not transform smoothly from a mercantilist state in the eighteenth century to a bastion of free trade in the late nineteenth. This boldly revisionist account gives the first satisfactory explanation of Britain's transformation from a minor power to the dominant nation in Europe. It also shows how Britain and France negotiated the critical trade treaty of 1860 that opened wide the European markets in the decades before World War I. Going back to the seventeenth century and examining the peculiar history of Anglo-French military and commercial rivalry, Nye helps us

understand why the British drink beer not wine, why the Portuguese sold liquor almost exclusively to Britain, and how liberal, eighteenth-century Britain managed to raise taxes at an unprecedented rate--with government revenues growing five times faster than the gross national product. *War, Wine, and Taxes* stands in stark contrast to standard interpretations of the role tariffs played in the economic development of Britain and France, and sheds valuable new light on the joint role of commercial and fiscal policy in the rise of the modern state.

With the complexity of the interactions between the methodology of science, the principles of justice, and the realities of the practice of law and criminalistics, ethical issues frequently arise. One of the hallmarks of a profession is a code of ethics to govern the actions of members of the profession with one another, with users of the professional service, and with those who are affected by actions of the practitioner. *Ethics in Forensic Science: Professional Standards for the Practice of Criminalistics* examines the necessity for a code of ethics for forensic scientists, describes the fundamental features of such an ethical code, illustrates some ethical conflicts that arise in the course of professional practice, and gives examples of resolution of some of these conflicts. This volume also describes the development of alternative ethical codes that have been adopted by forensic science organizations. It explores the strengths and weaknesses of varied codes and provides concrete examples that illustrate alternative courses of action that might be taken and how different codes of ethics may require, permit, or proscribe alternatives under consideration.

Anglo Saxon Protestant) heroes on television—like Robin Hood and the Cartwright family—but in Brooklyn she never encountered any. So she associated moving up with Ocean Parkway, a street that divides the working-class Italian neighborhood where she was born from the middle-class Jewish neighborhood into which she married. This book is Torgovnick's unflinching account of crossing cultural boundaries in American life, of what it means to be an Italian American woman who became a scholar and literary critic. Included are autobiographical moments interwoven with engrossing interpretations of American cultural icons from Dr. Dolittle to Lionel Trilling, The Godfather to Camille Paglia. Her experiences allow her to probe the cultural tensions in America caused by competing ideas of individuality and community, upward mobility and ethnic loyalty, acquisitiveness and spirituality.
