Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical

underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results).

Now in its fifth, expanded edition, *Using Sources Effectively, Fifth Edition* targets the two most prominent problems in current research-paper writing: the increase in unintentional plagiarism and the ineffective use of research source material. (Chapter 10). APA and MLA citation styles have been updated throughout the text.
