Homeschool Miami Florida Raising a Self-Reliant Child

From the book Raising Self-Reliant Children in a Self-Indulgent World. Every human being is born with the potential to become the world's most capable creature, not with the capabilities themselves. Unlike the amoeba, which is capable of functioning at its full potential from creation, humans acquire their capabilities primarily through apprenticeship: young human beings learn from those who have preceded them.

Amazon.com: Customer reviews: Raising Self-Reliant ...

I believe that raising a self-reliant child really starts from the moment you bring your child home from the hospital. One of the things you should be constantly thinking about in your parenting decisions is, is my child old enough to own this task themselves?

The book: Raising a Self-Reliant Child | Kids in the House

Michelle Obama chats with her mom about raising self-reliant kids in the season finale of The Michelle Obama Podcast. Barack and Michelle Obama have raised two daughters in the White House who turned out to be fine young women and college students and if you 're curious as to how Malia and Sasha Obama are so level-headed despite growing up in such extreme circumstances, it 's all because of Michelle 's mom Marian Robinson.

This important book goes beyond issues of strictness and leniency to show parents how to develop their children's values of accountability and adherence to responsible, internalized standards of behavior. Children will value the presence of these responsible, self-reliant, and mature traits in themselves.

No parent or educator can afford to ignore this groundbreaking work! Bestselling authors H. Stephen Glenn and Jane Nelsen have helped hundreds of thousands of parents raise capable, independent children with *Raising Self-Reliant Children in a Self-Indulgent World*. On its tenth anniversary, this parenting classic returns with fresh, up-to-date information to offer you inspiring and workable ideas for developing a trusting relationship with children, as well as the skills to implement the necessary discipline to help your child become a responsible adult. Those who think in terms of leniency versus strictness will be surprised. This book goes beyond these issues to teach children to be responsible and self-reliant—not through outer-directed concerns, such as fear and intimidation, but through inner-directed behavior, such as feeling accountable for one's commitments. Inside, you'll discover how to instill character-building values and traits in your child that last a lifetime. "During these turbulent days when families are in disarray and children are getting the short end of the stick, this book can be very helpful to parents who are struggling to bring up self-reliant children. Even after raising five of my own and becoming a grandfather for the seventh time, I got some new ideas out of it!"—Art Linkletter "An inspiring, workable formula for developing closeness, trust, dignity, and respect . . . a real gem."—Becky Ridgeway, School Social Worker

An Entertaining, Enlightening Look at the Art of Raising Self-Reliant, Independent Children Based on One American Mom ' s Experiences in Germany An NPR "Staff Pick" and One of the NPR Book Concierge's "Best Books of the Year" When Sara Zaske moved from Oregon to Berlin with her husband and

June Nelson

toddler, she knew the transition would be challenging, especially when she became pregnant with her second child. She was surprised to discover that German parents give their children a great deal of freedom—much more than Americans. In Berlin, kids walk to school by themselves, ride the subway alone, cut food with sharp knives, and even play with fire. German parents did not share her fears, and their children were thriving. Was she doing the opposite of what she intended, which was to raise capable children? Why was parenting culture so different in the States? Through her own family ' s often funny experiences as well as interviews with other parents, teachers, and experts, Zaske shares the many unexpected parenting lessons she learned from living in Germany. *Achtung Baby* reveals that today's Germans know something that American parents don't (or have perhaps forgotten) about raising kids with “ *selbständigkeit* ” (self-reliance), and provides practical examples American parents can use to give their own children the freedom they need to grow into responsible, independent adults.

With this practical guide, parents can end daily power struggles with their preschoolers, toddlers, and infants and create more time for the family to spend on things that matter by encouraging early childhood independence skills. We ' ve all heard the news about helicopter parents and boomerang children—but how can parents safeguard against these trends when our children ' s lives are increasingly scheduled and competitive? Pediatrician Dr. Alanna Levine offers a commonsense parenting approach that avoids divisive strategies and helps parents find a balanced ground between overindulgence and strict control. *Raising a Self-Reliant Child* focuses on teachable moments where parents can instill independence, such as sleep time, toilet training, mealtime, and playtime. With Dr. Levine ' s practical strategies and techniques, young children learn to take responsibility for their daily routines: babies learn to sleep through the night, toddlers learn to nap without their parents stretched out alongside, and school-age children learn to dress themselves and

make breakfast with little parental intervention. Overprotection and micromanagement keep young children from the self-development that comes naturally from learning and doing on one ' s own. And children who don ' t learn independence skills at an appropriate age grow into adults who expect others to fix challenges and conflicts for them. Dr. Levine helps you break the cycle of daily power struggles so that you and your family will have more time to focus on the things that really matter.

Reveals why young people struggle with low self-esteem and offers a program designed to help children develop a positive self-image

Provides parents with advice on using Jewish teachings from the Torah and Talmud to overcome struggles with raising children, nurture strengths and uniqueness, and encourage respectfulness towards their parents and others.

Prevent and counteract the general anxiety and emotional fragility prevalent in children and teenagers today—a new parenting philosophy and strategies that give children the tools to flourish on their own. “ A master synthesizer of attachment science, medical practice, and his own experience as a father, Harold Koplewicz capably and compassionately leads us through the art of scaffolding, from early childhood through the important adolescent period. ” —Daniel J. Siegel, MD, author of *The Whole Brain Child* Just as sturdy scaffolding is necessary when erecting a building and will come down when the structure grows stable, good parenting provides children with steady and warm emotional nourishment on the path toward independence. Never-ending parental problem-solving and involvement can have the opposite effect, enabling fragility and anxiety over time. In *The Scaffold Effect*, world-renowned child psychiatrist Harold

Koplewicz introduces the powerful and clinically tested idea that this deliberate build-up and then gradual loosening of parental support is the single most effective way to encourage kids to climb higher, try new things, grow from mistakes, and develop character and strength. Explaining the building blocks of an effective scaffold from infancy through young adulthood, he expertly guides parents through the strategies for raising empowered, capable people, including:

- Lay a solid foundation: The parent-child relationship needs to be made from the concrete mixture of emotional availability, positive reinforcement, clear messaging, and consistent rules. From this supportive base, you will forge a bond that will survive adolescence and grow stronger into adulthood.
- Empower growth: Skyscraper or sprawling ranch—the style of your child’s construction is not up to you! Scaffold parenting validates and accommodates the shape the child is growing into. Any effort to block or control growth will actually stunt it.
- Stay on their level: Imagine being on the ground floor of a house and trying to talk to someone on the roof. The person on the roof will have to “talk down” to you or yell. If your child’s building and your scaffold are on the same level, you can speak directly, look each other in the eye, and keep the lines of communication open.

Drawing on Dr. Koplewicz’s decades of clinical and personal experience, *The Scaffold Effect* is a compassionate, street-smart, and essential guide for the ages. All of the author’s proceeds from the sale of this book will be donated to the Child Mind Institute.

**NEW YORK TIMES BESTSELLER** In the tradition of Paul Tough’s *How Children Succeed* and Wendy Mogel’s *The Blessing of a Skinned Knee*, this groundbreaking manifesto focuses on the critical school years when parents must learn to allow their children to experience the disappointment and frustration that occur from life’s inevitable problems so that they can grow up to be successful, resilient, and self-reliant adults. Modern parenting is defined by an unprecedented level of overprotectiveness: parents who rush to school at

the whim of a phone call to deliver forgotten assignments, who challenge teachers on report card disappointments, mastermind children ' s friendships, and interfere on the playing field. As teacher and writer Jessica Lahey explains, even though these parents see themselves as being highly responsive to their children ' s well being, they aren ' t giving them the chance to experience failure—or the opportunity to learn to solve their own problems. Overparenting has the potential to ruin a child ' s confidence and undermine their education, Lahey reminds us. Teachers don ' t just teach reading, writing, and arithmetic. They teach responsibility, organization, manners, restraint, and foresight—important life skills children carry with them long after they leave the classroom. Providing a path toward solutions, Lahey lays out a blueprint with targeted advice for handling homework, report cards, social dynamics, and sports. Most importantly, she sets forth a plan to help parents learn to step back and embrace their children ' s failures. Hard-hitting yet warm and wise, *The Gift of Failure* is essential reading for parents, educators, and psychologists nationwide who want to help children succeed.

Stephanie started working as a volunteer because her community had a crime wave. Gradually, she became a crime prevention specialist and coordinator in “ high fear ” neighborhoods and saw drug dealers, domestic violence, child abusers, gangs, and social decay. But at the same time, she saw children who were able to move beyond fear, bullies, and abuse to excel in their chosen fields. She asked herself why some children struggle and fail while other kids excel under similar conditions. She found answers working with the homeless and started support groups, which included ex-felons. They wanted to know what they needed to change to stay out of prison. Stephanie worked with Pastor Flemon Henry in Oakland, California, and learned what many homeless people never learned as children. Everyone shared stories and discussed solutions. Within three months, some of the homeless found jobs while others admitted they had a drug

# Online Library Raising Self Reliant Children In A Indulgent World Seven Building Blocks For Developing Capable Young People

problem. They got them into drug rehab. As a result, Stephanie saw a critical need to help strengthen families when children are young and vulnerable. She developed this ten-step guidebook, which can help you find answers for your family. The key is self-awareness, which leads to self-discipline, self-control, and self-esteem. No matter what chaos has occurred in their lives, youth can succeed if they develop the three Cs: courage, character, and conscience. When youth have the emotional tools to avoid anger and temptations, they grow strong from within and less likely to go down a self-destructive path. Focus on prevention to keep children safe and healthy. Parents and grandparents can empower children so they learn how to stay emotionally centered! Adults can also help neighbors connect with each other. A network of caring adults can become mentors and keep children safe in neighborhoods. In this book, all “ A Life Experience ” stories are true! They are from Stephanie Mann ’ s experience and the people she worked with for thirty-five years. Their names have been changed to protect their identities.
