This book on the Strength Of Materials deals with the basic principles of the subject. All topics have been introduced in a simple manner. The book has been written mainly in the M.K.S. system of units. The book has been prepared to suit the requirements of students preparing for A.M.I.E. degree and diploma examinations in engineering. The chapters Shear Forces and Bending Moments, Stresses in Beams, Masonry Dams and Retaining Walls, Fixed and Continuous Beams and Columns and Struts: have been enlarged. Problems have been taken from A.M.I.E. and various university examinations. This edition contains hundreds of fully solved problems besides many problems set for exercise at the end of each chapter.

So far working stress method was used for the design of steel structures. Nowadays whole world is going for the limit state method which is more rational. Indian national code IS:800 for the design of steel structures was revised in the year 2007 incorporating limit state method. This book is aimed at training the students in using IS: 800 2007 for designing steel structures by limit state method. The author has explained the provisions of code in simple language and illustrated the design procedure with a large number of problems. It is hoped that all universities will soon adopt design of steel structures as per IS: 2007 and this book will serve as a good textbook. A sincere effort has been made to present design procedure using simple language, neat sketches and solved problems.

Assembly Language for x86 Processors, 6/e is ideal for undergraduate courses in assembly language programming and introductory courses in computer systems and computer architecture. Written specifically for the Intel/Windows/DOS platform, this complete and fully updated study of assembly language teaches students to write and debug programs at the machine level. Based on the Intel processor family, the text simplifies and demystifies concepts that students need to grasp before they can go on to more advanced computer architecture and operating systems courses. Students put theory into practice through writing software at the machine level, creating a memorable experience that gives them the confidence to work in any OS/machine-oriented environment. Proficiency in one other programming language, preferably Java, C, or C++, is recommended.

Notable luminaries throughout history have been inspired and humbled by the simple joy of riding a bicycle. For centuries, this powerful connection between people and bikes has driven humans forward as inventors, travelers, and thinkers. From Susan B. Anthony and Mark Twain to Eddy Merckx and Greg LeMond, collected here are entertaining, inspiring, and philosophical thoughts about cycling from writers (and riders) reflecting on the pleasures, power, and freedom of the bicycle. With beautiful black-and-white photos and illustrations on every spread, this elegant collection of quotations is sure to motivate anyone to get on their bike and enjoy the ride.

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States,

you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work.
