Despite the fact that Interventional Radiology is steadily moving toward a cli- cal specialty with the need for broad medical training, daily craftsmanship will always remain fundamental to what an interventional radiologist does. Without basic catheter and wire skills IR would not be what it is today. When I watch ex- rienced colleagues work I am always surprised to see that, concerning the technique and the materials, we all make the same choices. There is apparently a common IR skill, which is universal and can be learned with experience. I always see this with new IR fellows, that it takes time to step away from improvising and letting the p- cedure take the lead to logic and standardized control over a procedure. Choosing the right materials for the right job and building a level of con dence with these materials is a very important part of any IR fellowship. Why can a supervisor get a stable catheter position with a new wire in no time, whereas the fellow almost gives up? The difference is knowing your materials for this speci c indication and c- bining routine and standardized operational procedures. Hands-on workshops are always very popular at every IR meeting because one can really learn about basic skills. Lectures with the title "How I do it," can always count on a full audience.

Since she exploded on the scene with her two juicy and impossible-to-put-down tell-alls, readers have wanted to know even more about what makes Karrine Steffans tick. How was she able to meet all the high profile politicians, movie stars, and other celebrities that are her close acquaintances? What skills does she possess to keep men wanting more? Finally, Karrine lays it all out and explains exactly what a woman must do to win over the man of her dreams. With chapters like "Never Let Him See You Sweat," "Flirting," "Encouraging His Manhood," and "Give Him What He Wants," this hot and sexy manual is a must-have for every woman's bookshelf.

This volume constitutes the refereed proceedings of the 6th International Conference on Cross-Cultural Design, CCD 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCI International 2014, held in Heraklion, Crete, Greece, jointly with 13 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from numerous submissions. The papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. They thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The 76 papers included in this volume deal with the following topics: cross-cultural product and service design; cross-cultural issues in interaction; social aspects and implications of cross-cultural design; cross-cultural issues in e-commerce, marketing and branding; cross-cultural design for knowledge sharing and learning; cross-cultural design for the smart city and cross-cultural design for creativity.
