Saxon Geometry includes all topics in a high school geometry course, presented through the familiar Saxon approach of incremental development and continual review. The homeschool kit includes the Student Textbook, with 120 Lessons, 12 Investigations, and 15 Labs, the Solutions Manual, with step-by-step solutions to every problem in the book, and the Homeschool Packet, which includes Test Forms and Test Answers.

Geometry includes all topics in a high school geometry course, including perspective, space, and dimension associated with practical and axiomatic geometry. Students learn how to apply and calculate measurements of lengths, heights, circumference, areas, and volumes. Geometry introduces trigonometry and allows students to work with transformations. Students will use
