XGift By: Oramary This book is about human uniqueness, oneness, resolve, cunning, and sacrifice; characteristics needed to successfully preserve our way of life, and extend our species beyond the final finality all must face. The book illustrates how our history of violence toward one another honed these characteristics. The book illustrates how by honing them, humanity can survive if and when we must face a final conflict. The story points out the necessity to plan ahead for the finality, real problems that must be faced and solved to successfully extend the species. It is hoped that the reader will appreciate these characteristics and realize that while humanity has historically fought one another, we are a single species. And to survive, humanity must act as one.

“ Love me inside you. For I am inside you. I am there in every part of you, in each and every cell. And it is only when you reach deep into yourself that you come into profound contact with me. And it is only when you love yourself eternally that you are able to love me eternally. And I will always be here. ” -- JESUS Are you seeking spiritual guidance? Annotation This book comprises a selection of papers from IFSA 2007 on new methods and theories that contribute to the foundations of fuzzy logic and soft computing. These papers were selected from over 400 submissions and constitute an important contribution to the theory and applications of fuzzy logic and soft computing methodologies. Soft Computing consists of several computing paradigms, including fuzzy logic, neural networks, genetic algorithms, and other techniques, which can be used to produce powerful intelligent systems for solving real-world problems. This book is intended to be a major reference for scientists and engineers interested in applying new computational and mathematical tools to achieve intelligent solution to complex problems. We consider that this book can also be used to get novel ideas for new lines of research, or to continue the lines of research proposed by the authors of the papers contained in the book. The 80 papers presented were carefully reviewed and selected from more than 400 submissions. The papers are organized in topical sections on relation between interval and fuzzy techniques, intuitionistic fuzzy sets and their applications, the application of fuzzy logic and soft computing in flexible querying, philosophical and human-scientific aspects of soft computing, search engine and information processing and retrieval, perception based data mining and decision making, joint model-based and data-based learning: the fuzzy logic approach, fuzzy possibilistic optimization, fuzzy trees, fuzzy logic theory, type-2 fuzzy logic, fuzzy logic applications, neural networks and control, as well as intelligent agents and knowledge ant colony.
