With this resource, a school counselor will learn to use campus-specific data to identify the unique needs of a campus and design a comprehensive school counseling program to meet those needs. Bicycling advocates envision a future in which bikes are a widespread daily form of transportation, but this reality is still far away. Will we ever witness a true "bike boom" in cities? What can we learn from past successes and failures to make cycling safer, easier, and more accessible? In Bike Boom, journalist Carlton Reid uses history to shine a spotlight on the present and demonstrates how bicycling has the potential to grow even further, if the right measures are put in place by the politicians and planners of today and tomorrow. He explores the benefits and challenges of cycling, the roles of infrastructure and advocacy, and what we can learn from cities that have successfully supported and encouraged bike booms. In this entertaining and thought-provoking book, Reid sets out to discover what we can learn from the history of bike "booms."
