A paperback of the hardcover edition, first published in 1962. The book describes Goethe's Weimar from documents and research and interprets the connections between German culture and German society both in the age of Goethe and later. To this book Professor Bruford has written a sequel, The German Tradition of Self-Cultivation, and the two books together offer an introduction to the whole evolution of the German intellectual tradition.

Bulletface 4: The Cocaine King Gunfire and the fiery sting of bullets spiraling

through his body are Blake "Bulletface" King's last memories before the coma. Left struggling for his life following a vicious South Beach shooting, Bulletface wakes up in a Dade County hospital weeks later and immediately sets out to recuperate and bounce back to the celebrity rap god he's been for the past several years. It wouldn't take much. With tons of cocaine bricks and billions of dollars in illegal drug money at his disposal, he knows he'll be back to his old self in no time. He learns that his archenemy - Trintino "T-Walk" Walkson- has been assassinated, and the news brings him peace. But then he comes face to face with T-Walk's brothers, V-Walk and B-Walk, and he quickly learns that dangerous minds are inherent in the Walkson family.

Lewis Hamilton's explosive arrival on the Formula 1 scene has made front-page headlines. In *My Story*, for the first time Lewis opens up about his stunning debut season, including the gripping climax to the 2007 F1 World Championship, as well as his dad Anthony, his home life and his early years. The only book with the real story, as told by Lewis.

This book offers an integrated introduction to the topic of stability and vibration. Strikingly, it describes stability as a function of boundary conditions and eigenfrequency as a function of both boundary conditions and column force. Based on a post graduate course held by the author at the University of Southern Denmark, it reports on fundamental formulas and makes use of graphical representation to promote understanding. Thanks to the emphasis put on analytical methods and numerical results, the book is meant to make students and engineers familiar with all fundamental equations and their derivation, thus stimulating them to write interactive and dynamic programs to analyze instability and vibrational modes.

More than 300,000 copies sold! "This book will be like having the breath of God at your back. Let it lift you to new hope." —Dan B. Allender, PhD, author of *Bold Love* This new edition includes an expanded chapter on using the practical "prayer cards"—a hallmark of the teaching found in *A Praying Life*—and a chapter on the need and use of prayers of lament. Prayer is so hard that unless circumstances demand it—an illness, or saying grace at a meal—most of us simply do not pray. We prize accomplishments and productivity over time in prayer. Even Christians experience this prayerlessness—a kind of practical unbelief that leaves us marked by fear, anxiety, joylessness, and spiritual lethargy. Prayer is all about relationship. Based on the popular seminar by the same name, *A Praying Life* has discipled thousands of Christians to a vibrant prayer life full of joy and power. When Jesus describes the intimacy He seeks with us, He talks about joining us for dinner (Revelation 3:20). *A Praying Life* feels like having dinner with good friends. It is the way we experience and connect to God. In *A Praying Life*, author Paul Miller lays out a pattern for living in relationship with God and includes helpful habits and approaches to prayer that enable us to return to a childlike faith.

ACIS Donald J Murphy Prize for Distinguished First Book "Clearly written, convincingly argued, and transformative."--Nicholas Allen, author of *Modernism, Ireland and Civil War* "Goes beyond 'statism' and postnationalism toward a cosmopolitics of Irish transnationalism in which national belonging and national identity are permanently in transition."--Gregory Castle, author of *The Literary*

Theory Handbook "Shows how three important Irish writers crafted forms of cosmopolitan thinking that spring from, and illuminate, the painful realities of colonialism and anti-colonial struggle."--Marjorie Howes, author of *Colonial Crossings: Figures in Irish Literary History* "Asserting the simultaneity of national and global frames of reference, this illuminating book is a fascinating and timely contribution to Irish Modernist Studies."--Geraldine Higgins, author of *Heroic Revivals from Carlyle to Yeats* Looking at the writing of three significant Irish expatriates, Nels Pearson challenges conventional critical trends that view their work as either affirming Irish anti-colonial sentiment or embracing international identity. In reality, he argues, these writers constantly work back and forth between a sense of national belonging that remains incomplete and ideas of human universality tied to their new global environments. For these and many other Irish writers, national and international concerns do not conflict, but overlap--and the interplay between them motivates Irish modernism. According to Pearson, Joyce's *Ulysses* strives to articulate the interdependence of an Irish identity and a universal perspective; Bowen's exiled, unrooted characters are never firmly rooted in the first place; and in Beckett, the unsettled origin is felt most keenly when it is abandoned for exile. These writers demonstrate the displacement felt by many Irish citizens in an ever-changing homeland unsteadied by long and turbulent decolonization. Searching for a sense of place between national and global abstractions, their work displays a twofold struggle to pinpoint national identity while adapting to a fluid cosmopolitan world.

*Electronic Tools for Translators* offers complete explanations of a wide range of software products, information resources and online services that translators now need to understand and use. Individual chapters run through the origins and nature of the internet, the many ways of searching for information, and translation resources on the web, CD-ROMs as information sources, computer-assisted terminology management, the use and construction of corpora, translation memories, localization tools, and the incorporation of machine translation programmes into the translation process. Austermühl explains all these tools and resources in a clear, step-by-step way, suggesting learning tasks and activities for each chapter and guiding the reader through the jargon. Examples are drawn from English, French, German and Spanish. The book can be used as a text in regular classes on computer-assisted translation, in translation practice classes, as well as for self-learning by professionals wishing to update their skills.
