This book is a wide-ranging and timely overview of the contemporary Chinese banking system. It charts the vast changes in Chinese banking from before China's admission to the WTO in 2001 to more recent regulatory reform and developments in the shadow banking sector. The book begins with an economic history of the mono-banking system, and a critical discussion of reforms taken by the government in preparation for China's entry to the WTO. The second part of the book discusses banking regulation and government policy during and after the global financial crisis in 2008-2009 and their impact on

banking, including recent developments. Finally, the book concludes an empirical analysis of the impact of banking reforms on a number of important issues, including bank efficiency, capital structure, competition and financial stability, and risk taking behaviour, and a review of the relevance of shadow banking and internet banking.

This book contains the refereed proceedings of the 2nd Advances in Business Research International Conference (ABRIC2016). Chapters in the book address the theme of Advancing Knowledge, Connecting the World, reflecting on the emerging issues in various business management fields and the interconnections of multiple disciplines for creating knowledge advancement. Papers were carefully reviewed and selected and grouped into four main themes: economic and finance, marketing and communications, management, and information

with large capital flows to a number of emerging economies in Latin America and Asia often being followed by financial crises.

Taxes are a crucial policy issue, especially in developing countries. Just recently, proposals to raise middle-class taxes toppled the Bolivian government, and plans to extend or increase the value-added tax caused political unrest in Ecuador and Mexico. Despite the impact of tax policy on developing countries, a comprehensive study has yet to be written. Treating Argentina, Brazil, India, Kenya, Korea, and Russia as key case studies, this volume outlines the major aspects of current tax codes and explores their economic and political implications. Examples of both the poorest and wealthiest developing countries, Argentina, Brazil, India, Kenya, Korea, and Russia uniquely demonstrate the diverse fiscal problems of tax reform. Each economy

relies heavily on indirect and corporate income taxes, though recently some have reduced their tariff rates and have switched from excise to value-added taxes. There is a large, informal economy in most of these countries, and tax evasion by firms is a significant concern. As a result, tax revenue remains low, even though rates are as high as those in developed economies. Also, unconventional methods to collect revenue have been implemented, including bank debit taxes, state ownership of firms, and implicit taxes on individuals in the informal sector. Exploring these and other concerns, as well as changes in tax law, administration, and fiscal pressures, this comprehensive anthology clarifies the current landscape of tax administration and the economic future of the world's poorer economies.

A practical guide to getting personal investing right Somewhere along

the way, something has gone very wrong with the way individuals save and invest. Too often, households are drawn in by promotional suggestions masquerading as impartial investment advice. Consumers get saddled with more risk than they realize. Authors Zvi Bodie and Rachelle Taqqu understand the dilemma that today's investors face, and with *Risk Less and Prosper* they will help you find your financial footing. Written in an accessible style, this practical guide skillfully explains why personal investing is all about you—your goals, your values and your career path. It shows how to understand investment risk and choose the particular blend of risk and safety that is right for you. And it lays out several simple yet powerful ways for small investors to cast a reliable safety net to achieve their financial goals and truly prosper. Coauthors Bodie and Taqqu challenge the myth that all investments require risk, then highlight some important risks that

Preventing risks of severe damage from climate change not only requires deep cuts in developed country greenhouse gas emissions, but enormous amounts of public and private investment to limit emissions while promoting green growth in developing countries. While attention has focused on emissions limitations commitments and architectures, the crucial issue of what must be done to mobilize and govern the necessary financial resources has received too little consideration. In Climate Finance, a leading group of policy experts and scholars shows how effective mitigation of climate change will depend on a complex mix of public funds, private investment through carbon markets, and structured incentives that leave room for developing country innovations. This requires sophisticated national and global regulation of cap-and-trade and offset markets, forest and energy policy, international development funding, international trade

law, and coordinated tax policy. Thirty-six targeted policy essays present a succinct overview of the emerging field of climate finance, defining the issues, setting the stakes, and making new and comprehensive proposals for financial, regulatory, and governance mechanisms that will enrich political and policy debate for many years to come. The complex challenges of climate finance will continue to demand fresh insights and creative approaches. The ideas in this volume mark out starting points for essential institutional and policy innovations.
