Technology infiltrates our lives so rapidly that few of us stop to consider the potential health implications. Yet could the technology designed to improve our lives actually be making us sick? Scientists have long believed that there is a link between health problems and radiation from mobile phones, wireless connections, powerlines, and electronic devices. Radiation has been linked to issues such as depression, fatigue, miscarriages, childhood leukaemia, and even brain tumours. In *The Force*, Lyn McLean shows us why electropollution is among the most important health issues of our time. Examining research from around the world, she explains how and why we are all at risk and offers practical, easy-to-understand advice for homeowners, parents, and employees wanting to reduce their exposure at home and in the workplace. This edition includes developments from 2011 to 2015.

Collaborative Statistics is intended for introductory statistics courses being taken by students at two- and four-year colleges who are majoring in fields other than math or engineering. Intermediate algebra is the only prerequisite. The book focuses on applications of statistical knowledge rather than the theory behind it. Barbara Illowsky and Susan Dean are professors of mathematics and statistics at De Anza College in Cupertino, CA. They present nationally on integrating technology, distance learning, collaborative learning, and multiculturalism into the elementary statistics classroom.

Depicts artifacts and objects from the collections of the various museums of the Smithsonian Institution that honor the human impulses of discovery, imagination, and memory

Recounts and includes commentary on twelve chess matches involving the best players of all time

Many significant problems in metaphysics are tied to ontological questions, but ontology and its relation to larger questions in metaphysics give rise to a series of puzzles that suggest that we don't fully understand what ontology is supposed to do, nor what ambitions metaphysics can have for finding out about what reality is like. Thomas Hofweber aims to solve these puzzles about ontology and consequently to make progress on four central metaphysical problems: the philosophy of arithmetic, the metaphysics of ordinary objects, the problem of universals, and the question of whether the reality is independent of us. Crucial parts of the proposed solution involve considerations about quantification and its relationship to ontology, the place of reference in natural languages, the possibility of ineffable facts, the extent of empirical evidence in metaphysics, and whether metaphysics can be properly esoteric. Overall, Hofweber defends a rationalist account of arithmetic, an empiricist picture in the philosophy of ordinary objects, a restricted form of nominalism, and realism about reality, understood as all there is, but idealism about reality, understood as all that is the case. He defends metaphysics as having some questions of fact that are distinctly its own, with a limited form of autonomy from other parts of inquiry, but rejects several metaphysical projects and approaches as being based on a mistake.

On a mission to secure medicine for a friend, witch Missy Berta encounters much more than she ever bargained for. Accidentally waking a sleeping werebear, the sexy stranger spins a wild tale that Missy can hardly believe. Struggling to fathom his story, she's inexplicably drawn to his charm, his unwavering desire to protect her, and of course, to his irresistible, mouth-watering body.Zane Barons is completely out of his element. While his skills to survive are limited in this strange realm, he's delighted to have met such a delectable and curvaceous human. She might treat him with kindness, but she seems determined to avoid spending time with him.Hell bent on proving that she is his fated mate, Zane will do anything to make her happy--except walk away.

ONE OF PUBLISHERS WEEKLY'S BEST BOOKS OF THE YEAR Master storyteller Sharon Shinn has thrilled readers with her national bestselling *Twelve Houses* series. Now experience her original new novel in which love and loyalty are tested at every turn.... For fifteen years, Maria Devane has been desperately, passionately in love with Dante Romano. But Maria knows that Dante can never give everything of himself back—at least not all of the time. Every month, Dante shifts shape, becoming a wild animal. He can't choose when he shifts, the transition is often abrupt, and, as he gets older, the time he spends in human form is gradually decreasing. Maria has kept his secret since the beginning, knowing that their love is worth the danger. But when a string of brutal attacks occurs in local parks while Dante is in animal form, Maria is forced to consider whether the lies she's been telling about her life have turned into lies she's telling herself...

People experiencing disorders in regulation are highly sensitive to stimulation from the environment, emotionally reactive, and have difficulty maintaining an organized and calm life style. They are impulsive, easily frustrated, and as a result make decisions that lead to an overwrought state-or who conversely retreat entirely from the world. This disorder is most likely to accompany diagnoses of bipolar or mood disorder, anxiety, depression, obsessive-compulsive disorder, Asperger's syndrome, eating or sleep disorders, and/or attention deficit disorder. This book instructs therapists how best to treat the dysregulated adult, providing diagnostic checklists, and a chapter by chapter inventory in approaching treatment of dysregulation in a variety of life skills. Informs the therapist how dysregulation relates to multiple disorders Includes clinical observations and case studies Gives the therapist tools and techniques for the client to understand his behavior, reframe problems in a positive way, and take responsibility for behavior change Encompasses sensory integration therapy and mind-body techniques for the therapist to guide the client toward self-calming Emphasis on effective relational dynamics between the client and significant persons in his or her life Separate chapters on how to treat dysregulation effects on multiple behaviors, including mood regulation, behavioral control, inattention, sleep, feeding, and social interactions

Tired of being picked on by a trio of popular girls, fourteen-year-old poet Emily hires a major public relations firm to change her image and soon finds herself "re-branded" as Em, one of the most important teens not only in her middle school, but in celebrity magazines, as well.
