Great Resource for Teaching Problem Solving Skills In this Executive FUNCTION Series book, kids are introduced to the SODAS steps to problem solving. They are encouraged to identify the problem, come up with options for dealing with the situation, weigh the advantages and disadvantages of each option, and choose one option as the solution.

This second edition of the popular math teaching resource book Math Stories for Problem Solving Success offers updated true-to-life situations designed to motivate teenagers to use math skills for solving everyday problems. The book features intriguing short stories followed by sets of problems related to the stories that are correlated to the standards of the National Council of Teachers of Mathematics. Each of the easy-to-read stories is followed by three increasingly difficult groups of problem sets. This makes it simple for teachers to select the appropriate problem set for students of different abilities and at different grade levels. To further enhance student involvement, the stories feature recurring characters and can be used either sequentially or out of order. The problems in the book cover many basic math topics, including decimals, fractions, and percents; measurement; geometry; data, statistics, and probability; algebra; and problem solving. In addition to having all the answers, an Answer Key at the end of the book offers explanations and background information about the problems that can be helpful to both teachers and students. Math Stories for Problem Solving Success will help you show students that math is something they are already using every day.

All fiction is character-driven, according to William Bernhardt, despite what you might have heard elsewhere. If your characters don't interest readers, even the most exciting plots will fail. "Action is character," Aristotle wrote, but what does that mean, and how can you use that fundamental principle to create dynamic fiction that will captivate readers? This book explains the relationship between character and plot, and how the perfect melding of the two produces a mesmerizing story. Using examples spanning from The Odyssey to The Da Vinci Code, Bernhardt discusses the art of character creation in a direct and easily comprehended manner. The book also includes exercises designed to help writers apply these ideas to their own work. William Bernhardt is the author of more than fifty novels, including the blockbuster Ben Kincaid series of legal thrillers. Bernhardt is also one of the most sought-after writing instructors in the nation. His programs have educated many authors now published by major houses. He is the only person to have received the Southern Writers Gold Medal Award, the Royden B. Davis Distinguished Author Award (U Penn) and the H. Louise Cobb Distinguished Author Award (OSU), which is given "in recognition of an outstanding body of work that has profoundly influenced the way in which we understand ourselves and American society at large." The Red Sneaker Writing Center is dedicated to helping writers achieve their literary goals. What is a red sneaker writer? A committed writer seeking useful instruction and guidance rather than obfuscation and attitude. Red sneakers get the job done, and so do red sneaker writers, by paying close attention to their art and craft, committing to hard work, and never quitting. Are you a red sneaker writer? If so, this book is for you.

A blue crayon mistakenly labeled as "red" suffers an identity crisis in this picture book by the New York Times-bestselling creator of My Heart Is Like a Zoo and It's an Orange Aardvark! Funny, insightful, and colorful, Red: A Crayon's Story, by Michael Hall, is about being true to your inner self and following your own path despite obstacles that may come your way. Red will appeal to fans of Lois Ehlert, Eric Carle, and The Day the Crayons Quit, and makes a great gift for readers of any age! Red has a bright red label, but he is, in fact, blue. His teacher tries to help him be red (let's draw strawberries!), his mother tries to help him be red by sending him out on a playdate with a yellow classmate (go draw a nice orange!), and the scissors try to help him be red by snipping his label so that he has room to breathe. But Red is miserable. He just can't be red, no matter how hard he tries! Finally, a brand-new friend offers a brand-new perspective, and Red discovers what readers have known all along. He's blue! This funny, heartwarming, colorful picture book about finding the courage to be true to your inner self can be read on multiple levels, and it offers something for everyone.

It was a simple incident in the life of James Clavell—a talk with his young daughter just home from school—that inspired this chilling tale of what could happen in twenty-five quietly devastating minutes. He writes, "The Children's Story came into being that day. It was then that I really realized how vulnerable my child's mind was —any mind, for that matter—under controlled circumstances. Normally I write and rewrite and re-rewrite, but this story came quickly—almost by itself. Barely three words were changed. It pleases me greatly because I kept asking the questions... Questions like, What's the use of 'I pledge allegiance' without understanding? Like Why is it so easy to divert thoughts? Like What is freedom? and Why is so hard to explain? The Children's Story keeps asking me all sorts of questions I cannot answer. Perhaps you can—then your child will...."

Integrate engineering and literacy into your curriculum with this innovative approach to learning. Students will read fictional passages and solve problems using STEM and the engineering design process. Students can create devices and solutions using everyday materials. Each unit focuses on one problem and one challenge, but other problems are presented as options for future challenges. The activity pages invite individual and group work with room for brainstorming, problem-solving, building, testing, and reflecting.

Teachers, especially those in nursery and pre-primary schools, know that it takes specialized learning aids to help children learn how to identify objects, develop eye-hand and fine motor coordination, improve attention span, and learn to focus on the activity in which they are participating. The aim of BEE CLEVER Activity Books Keeping these important learning factors in mind, a pre-school educator and counsellor has created a series of simple and stimulating activity books. These help develop the skills a child needs, plus contribute to the further development of the child's 'writing readiness'. Pallavi Dalal - the creator of BEE CLEVER Activity Books - has spent over 25 years working with pre-school children. She says, "There has been much thought, care, understanding, laughter and joy that has gone into creating these books. I can only hope that they will bring children many 'magical moments' of learning, and spending time with each other in a happy and relaxed frame of mind." Two Important Factors While planning any activity for children, two important principles of learning are always uppermost in her mind: 1. "I see and I remember." 2. "I do and I understand." She has designed these books to develop differentiating and logical thinking skills in children and evaluate their interests in certain areas, without making them feel like they are being 'tested'! How BEE CLEVER books are DIFFERENT - Objects illustrated are those a child is generally familiar with. - Instructions can be read to a child without having to simplify them. - Illustrations are bold and clear for the child to see and work comfortably. - Accurate use of grammar, punctuation and spelling. - Each book in the series explains the value of doing that specific activity. - Simple 'Do's and Don'ts' create a 'win-win' situation for the child. BEE CLEVER SERIES: - Colouring 1 - Colouring 2 - Join the Dots 1 - Join the Dots 2 Matching - Mazes 1 - Mazes 2 - Numbers 1 - Numbers 2 - Odd One Out - Opposites 1 - Opposites 2 - Pattern & Letter Writing 1 - Pattern & Letter Writing 2 - Phonics 1 - Phonics 2 - Shapes 1 - Shapes 2 - Story Sequence - What's Different? - What's Next? - What's Wrong?
