The Historical Volume of what was originally called Reformed Dogmatics now appears with a new title, namely, History of Christian Doctrines. Works on the gradual development of theological truth in the Church of Jesus Christ usually appear alongside of those which deal with the systematic reproduction of it, and thus stand out as separate works. It was thought best to follow this practice, since this will stress the fact that, after all, the history of the development of Christian thought in the Church is a separate study.

This new printing of Louis Berkhof's classic Systematic Theology represents a publishing landmark. For the first time in its long and acclaimed history, Berkhof's monumental treatment of the doctrines of the Reformed faith is now available together in one volume with Introduction to the Study of Systematic Theology, Berkhof's formal prolegomenon to his theology. Meant to be read together with Systematic Theology, the Introduction includes Berkhof's discussions of the nature and character of dogmatics, the methods and history of the theological system, and the principia, or foundations, of theology - Scripture and God. This edition also includes a new preface by Richard A. Muller that explains both the publishing history and the relation and importance of the Introduction to the rest of Berkhof's text. Written in a concise and compact style and organized in a manner ideal for detailed study, Systematic Theology covers the full range of theology in traditional systematic fashion - examining, in order, the doctrines of God, anthropology, Christology, soteriology, ecclesiology, and eschatology. The work also includes an extensive bibliography and full indexes to the

authors, subjects, and Scriptures referenced in the text. Revised and enlarged throughout his lifetime until it reached its present final form, *Systematic Theology* not only stands as Berkhof's magnum opus but also is widely considered to be the most important twentieth-century compendium of Reformed theology.

This clear and concise text helps readers grasp the doctrines of the Christian faith considered basic from the earliest days of Christianity. Ronald Heine, an internationally known expert on early Christian theology, developed this book from a course he teaches that has been refined through many years of classroom experience. Heine primarily uses the classical Christian doctrines of the Nicene Creed to guide students into the essentials of the faith. This broadly ecumenical work will interest students of church history or theology as well as adult Christian education classes in church settings. Sidebars identify major personalities and concepts, and each chapter concludes with discussion questions and suggestions for further reading.

Long-Awaited *Systematic Theology* by Well-Known Pastor, Author, and President of the Master's Seminary Doctrine isn't just for theologians—it's important for every Christian because it shows us who God is and how we should live.
