Bloomberg’s Jason Kelly, author of The New Tycoons, profiles the participants, entrepreneurs, and investors at the center of this movement, exploring this phenomenon in which a surge of people—led by the most affluent—are becoming increasingly obsessed with looking and feeling better. Through in-depth looks inside companies and events from New York Road Runners to Tough Mudder and Ironman, Kelly profiles the companies and people aiming to meet the demands of these consumers, and the traits and strategies that made them so successful. In a modern world filled with anxiety, pressure, and competition, people are spending more time and money than ever before to soothe their minds and tone their bodies, sometimes pushing themselves to the most extreme limits. Even as obesity rates hit an all-time high, the most financially successful among us are collectively spending billions each year on apparel, gear, and entry fees. Sweat Equity charts the rise of the movement, through the eyes of competitors and the companies that serve them. Through conversations with businesspeople, many driven by their own fitness obsessions, and first-hand accounts of the sports themselves, Kelly delves into how the movement is taking shape. Modern fitness is not just about how we move our bodies; it’s about how we move our brains as well. Whole Motion offers a complete picture of how to strengthen your resolve, gain laser-sharp focus, boost your ability to remember, calm your anxiety levels, master your emotional responses, and embody your body like never before. Author Derek Beres uncovers the latest research in how the brain is affected by a number of different exercise formats. The book offers sample workouts designed to give your brain the greatest stimulation and regeneration possible. Whole Motion is divided into two main sections. In the Movement section, Beres looks at the movement science and neuroscience behind Feldenkrais, strength training, HIIT, yoga, and meditation. He reveals the latest research behind each movement discipline and incorporates anecdotal examples from clients and students. He also includes information on when and why to perform each exercise. In the Mind section, Beres investigates the other side of fitness: nutrition, regeneration, flow, and disruption, as well as how to choose music for optimal workouts and the neurological cost of distraction. This section is the lifestyle component, focusing on how to create the best environment to achieve a sense of completeness in brain and body.

This beautifully illustrated book is sure to inspire the home and soul.

Transformational festivals, from Burning Man to Lightning in a Bottle, Bhakti Fest, and Wanderlust, are massive events that attract thousands of participants to sites around the world. In this groundbreaking book, Amanda J. Lucia shows how these festivals operate as religious institutions for “spiritual, but not religious” (SBNR) communities. Whereas previous research into SBNR practices and New Age religion has not addressed the predominantly white makeup of these communities, White Utopias examines the complicated, often contradictory relationships with race at these events, presenting an engrossing ethnography of SBNR practices. Lucia contends that participants create temporary utopias through their shared commitments to spiritual growth and human connection. But they also participate in religious exoticism by adopting Indigenous and Indic spiritualities, a practice that ultimately renders them exclusive, white utopias. Focusing on yoga’s role in disseminating SBNR values, Lucia offers new ways of comprehending transformational festivals as significant cultural phenomena.

Interdisciplinary in nature, this project draws on fiction, non-fiction and archival material to theorize urban space and literary/cultural production in the context of the United States and New York City. Spanning from the mid-1970s fiscal crisis to the 1987 Market Crash, New York writing becomes akin to geographical fieldwork in this rich study.
