A "bracing and well-argued" study of America's college debt crisis—"necessary reading for anyone concerned about the fate of American higher education" (Kirkus). College is far too expensive for many people today, and the confusing mix of federal, state, institutional, and private financial aid leaves countless students without the resources they need to pay for it. In *Paying the Price*, education scholar Sara Goldrick-Rab reveals the devastating effect of these shortfalls. Goldrick-Rab examines a study of 3,000 students who used the support of federal aid and Pell Grants to enroll in public colleges and universities in Wisconsin in 2008. Half the students in the study left college without a degree, while less than 20 percent finished within five years. The cause of their problems, time and again, was lack of money. Unable to afford tuition, books, and living expenses, they worked too many

hours at outside jobs, dropped classes, took time off to save money, and even went without adequate food or housing. In many heartbreaking cases, they simply left school—not with a degree, but with crippling debt. Goldrick-Rab combines that data with devastating stories of six individual students, whose struggles make clear the human and financial costs of our convoluted financial aid policies. In the final section of the book, Goldrick-Rab offers a range of possible solutions, from technical improvements to the financial aid application process, to a bold, public sector-focused “first degree free” program. "Honestly one of the most exciting books I've read, because [Goldrick-Rab has] solutions. It's a manual that I'd recommend to anyone out there, if you're a parent, if you're a teacher, if you're a student."—Trevor Noah, The Daily Show

This edition of the of "The Son of the Red Corsair" is the only English translation of the Italian "Il figlio del corsaro rosso" by Emilio Salgari, an Italian writer of adventure and science fiction stories for readers of all ages young at heart. His books are regarded as classics and are still in print many years after their initial publication. They have been translated in several languages and, besides Italy, they are especially popular in the Spanish speaking world. A prolific writer, Salgari authored 80 novels and about 150 short stories. A captivating mix of adventure, romance and comedy, The Son of The Red Corsair is the story of Enrico of Ventimiglia, an Italian gentleman disguised as a corsair, as he fights his way through the Spaniards conquerors of Central America in search of the half-sister he has never met, the child of his father's second wife, the daughter of Darien's Gran Cacique. In his adventures he is attended by a handful of colorful characters like the faithful Mendoza, Buttafuoco, a French gentleman turned buccaneer, and the boisterous Don Barrejo. Helping him are also the beautiful Marquise of Montelimar and the bands of the Pirates of the Caribbean.

Often management is the art of making strategic and tactical decisions with a total lack of objective information. How often do we wish for a crystal ball that would let us see how decisions today will play out in the future? Unfortunately it is not yet possible to predict the future, but it is possible to generate objective criteria to help make today's decisions. While simulation has been around for decades, recent advances have made it much more accessible and useful in our daily world. The software is now less expensive and easier to learn and use. And the flexibility and accuracy have dramatically improved. But most important, modern tools allow you to solve problems much faster than ever before - making those solutions timelier and less costly, and letting you reap the benefits quickly. Self-help groups have encountered fierce criticism as places where individuals join to share personal problems and to engage in therapeutic intervention without the aid of skilled professionals. These groups have flourished since the 1970s and continue to serve more people than professional therapy. Yet these groups have been criticized as fostering a culture of whiners and victims, and not using professional help as needed. Thomasina Jo Borkman debunks this commonly held assessment, and also examines the reasons for these groups' enduring popularity since the 1960s--more people attend these meetings (word?) than see professional therapists. What accounts for their success and popularity? *Understanding Self-Help / Mutual-Aid Groups* is the first book to describe three stages of individual and group evolution that is part of this organization's very structure; it also reconceptualizes participants' interactions with professionals. The group as a whole, Borkman posits, draws on the life experiences of its membes to foster nurturing, support, and transformation through a "circle of sharing." Groups create more positive and less stigmatizing "meaning perspectives" of the members' problems than is available from professionals or lay folk culture.
