Summary of Sennett. January 24, 2012 by Richard. Richard Sennett: The Fall of Public Man. Richard Sennett traces what he views as the erosion of public life since the 18th century. He claims that, during the 18th century, the public and private realms were more clearly defined and separated. Claims of civility – cosmopolitan, public behavior – balanced against claims of nature – the family.

THE FALL OF PUBLIC MAN is a book in the great tradition of sociological scholarship. Sennett writes first of the tension between the public and private realms in which we live, arguing that different types of behaviour and activity are appropriate in each. He argues that the barrier between these different realms has been eroded, and that this breakdown is so profound that public man has been left with no certain idea of his role in society. Sennett sees the development of the city as the single most important element of the social change he describes, and puts his argument in its historical perspective through an analysis of the changes in our built environment from the 18th century to the present day.

Abigail Walker and Jarvis Daniels are longtime sweethearts headed in opposite directions. Abby, an aspiring cellist, wants out of her humble Detroit surroundings and is willing to shed blood, sweat, and tears to make it happen. Jarvis, on the other hand, is perfectly content with life. For him there's plenty of time to become a "responsible adult." For now, he's got everything he could want: a roof over his head, a PlayStation, and the love of a good woman. When Abby's music career takes off and she moves to Chicago, Jarvis gets the boot---sort of. Abby still loves him, but his penchant for faded sweaters and meatball subs just doesn't fit into her new, sophisticated world of designer gowns and concert halls. They're in different leagues and Abby makes no qualms of reminding him of it whenever she deigns to visit him. When the couple is involved in a near-fatal car crash, they are broken, stripped, and broken again both stumbling through a journey of healing and self-discovery as they struggle to accept the merciful hand of the only One who can help them up after a fall.

The true story of John Duval Gluck, Jr., who in 1913 founded the Santa Claus Association, which had the sole authority to answer Santa's mail in New York City. He ran the organization for 15 years, gaining fame for making the myth of Santa a reality to poor children by arranging for donors to deliver the toys they requested, until a crusading charity commissioner exposed Gluck as a fraud. The story is wide in scope, interweaving a phony Boy Scout group, kidnapping, stolen artwork, and appearances by the era's biggest stars and New York City ' s most famous landmarks. The book is both a personal story and a far-reaching historical one, tracing the history of Christmas celebration in America and the invention of Santa Claus.

NEW EDITION!!Well... it seems that these animals don't want to take their medicine! But step by step, each one discovers that taking medicine is very important for the animals, as well as for the children!A funny way to learn and a funny way to teach. As everyone knows how difficult it can be to explain to young children how important it is to take medicine...---THE BOOK OF THE ANIMALS:FUN LEARNING FOR CHILDREN AND PARENTSWhat are certainly the most occurring moments in a parent's life? When their child doesn't want to wash, eat, sleep, go to school, share, take medicine, get vaccinated... And what can a parent answer to these refusals?The successful "Book of The Animals" bilingual children's books series was created with the aim to help both parents and children to discover the benefits of washing, eating, sleeping, going to school, sharing, taking medicine, getting vaccinated... in a fun as well as educational manner. Since the books are also bilingual, parents will enjoy the teaching and the interactivity they can gain from reading them with their children.THE AUDIENCEThe books are geared towards children aged 2-5, before elementary/primary school.They will likely be bilingual children whose parents want to encourage the learning of their two current languages.They will also be

**REVIEW** "The Book of the Animals is a planned series of illustrated books for young children. [...] These delightful books tell the story of what happens when the animals in the stories, like many young children, don't want to eat and don't want to wash... The books are very suitable both for reading to young children and for older children to use to learn to read in both languages. They might even persuade them to wash and eat their dinner! The repetitive structure is supportive of children learning new words and the illustrations work well alongside the text to help understanding of unfamiliar words. I can easily imagine young children demanding repeat readings and enjoying learning the text by heart as many children do with favourite stories. Children learning to make up and write their own stories might well want to write a personalised version, using the structure as a prop. I think the stories would work well both in the home and in the classroom." A study of deconstruction demystifies its theories and traces the scandalous fate of its fallen idol, Paul de Man

A preeminent thinker redefines the meaning of city life and charts a way forward Building and Dwelling is the definitive statement on cities by the renowned public intellectual Richard Sennett. In this sweeping work, he traces the anguished relation between how cities are built and how people live in them, from ancient Athens to twenty-first-century Shanghai. He shows how Paris, Barcelona, and New York City assumed their modern forms; rethinks the reputations of Jane Jacobs, Lewis Mumford, and others; and takes us on a tour of emblematic contemporary locations, from the backstreets of Medellín, Colombia, to the Google headquarters in Manhattan. Through it all, he laments that the “closed city” —segregated, regimented, and controlled—has spread from the global North to the exploding urban agglomerations of the global South. As an alternative, he argues for the “open city,” where citizens actively hash out their differences and planners experiment with urban forms that make it easier for residents to cope. Rich with arguments that speak directly to our moment—a time when more humans live in urban spaces than ever before—Building and Dwelling draws on Sennett’s deep learning and intimate engagement with city life to form a bold and original vision for the future of cities.
