This synthesis will be of interest to transit agency staff responsible for vehicle maintenance and planning at their agencies. Staff can use this report to learn from the experiences of other agencies, as well as to compare their experiences with those of other agencies. It documents and summarizes transit agency experiences, using various maintenance productivity

Online Library Thermo King Bus Manual

improvements and programming. The report summarizes the experiences of agencies that vary in size, union affiliation, and operating conditions. It provides descriptions of successful programs and creative modifications to existing programs.

This report should be of interest to transit bus maintenance managers and others interested in the development of written transit bus maintenance procedures, or "practices," and the sharing of these practices with others in the transit industry. The report provides guidance on how to develop effective transit bus maintenance practices tailored to one's local operating

Online Library Thermo King Bus Manual

environment. It provides seven sample practices developed using the guidance. Complementing this report is an on-line Web Board sponsored by the Transportation Research Board's Committee on Transit Fleet Maintenance. This Web Board allows transit agencies to post their maintenance practices for others to review, revise as necessary for their own operating conditions, and use. The report provides instructions on how to access the Web Board, use it to develop maintenance practices, and share these practices among transit agencies.
