Livable Cities from a Global Perspective offers case studies from around the world on how cities approach livability. They address the fundamental question, what is considered "livable?" The journey each city has taken or is currently taking is unique and context specific. There is no such thing as a one-size-fits-all approach to livability. Some cities have had a long history of developing livability policies and programs that focus on equity, economic, and environmental concerns, while other cities are relatively new to the game. In some areas, government has taken the lead while in other areas, grassroots activism has been the impetus for livability policies and programs. The challenge facing our cities is not simply developing a livability program. We must continually monitor and readjust policies and programs to meet the livability needs of all people. The case studies investigate livability issues in such cities as Austin, Texas; Helsinki, Finland; London, United Kingdom; Warsaw, Poland; Tehran, Iran; Salt Lake City, United States; Rio de Janeiro, Brazil; Sydney, Australia; and Cape Town, South Africa. The chapters are organized into such themes as livability in capital city regions, livability and growth and development, livability and equity concerns, livability and metrics, and creating livability. Each chapter provides unique insights into how a specific area has responded to calls for livable cities. In doing so, the book adds to the existing literature in the field of livable cities and provides policy makers and other organizations with information and alternative strategies that have been developed and implemented in an effort to become a livable city.

NEW 3rd Edition - September 2020 This is the third edition of the book that has earned 14 5-star reviews. It's now bigger,richer and better. Your walk-through guide to Developer Marketing and Relations now has 9 new chapters since the first edition + 1 more reviewed chapter. Build your DevRel dream team and project. Learn from success and failure stories. Welcome to the third edition of "Developer Marketing and Relations: The Essential Guide". The history starts in October 2017, during the Future Developer Summit. There, Andreas Constantinou and Nicolas Sauvage fully recognized the fragmented nature of developer relations or DevRel - from the types of companies, the products they represented, and the knowledge of the practitioners. It was there we witnessed that the best practices were often locked behind the doors of the companies that mastered them. We knew we wanted develop an essential guide to share this knowledge with a broader audience of developer relations, evangelists & advocates, developer marketing practitioners and beyond. As we have watched the practice of DevRel grow and evolve over the last three years, there is a continued need for education of what DevRel is, along with the strategy and tactics needed for a successful program. The good news is, many of the leading practitioners from the best companies agreed to share their knowledge, stories, learnings, and best practices in this guide! We think you'll find the information insightful, whether you are a seasoned professional in developer relations or you are just getting started. A question we often get asked is: "Can you help us understand how Mozilla, Google, or Microsoft practice developer marketing?" (replace names with your favorite tech brands). That's exactly what this book aims to accomplish. This guide is arranged in an order that takes you from strategic issues to more tactical issues. You can read from start to finish, or jump into the chapter that focuses on what you need to know right now. At a strategic level, you may want to read "Using Developer Personas to Stay Customer-Obsessed" from Cliff Simpkins of Microsoft, or if you are building out a program you might try "Structuring Developer Relations", by Dirk Primbs of Google. If you are just starting out, be sure to read, "Starting from Scratch: How to Build a Developer Marketing Program", by Luke Kilpatrick of Nutanix. If you need to get many stakeholders together in a large organization, the "The Developer Relations Council: Leading and Aligning Developer Marketing within Large Companies" by Arabella David of Salesforce - a new chapter for the third edition- is a must. Then, learn how to understand numbers and KPIs in our new chapter "Measuring the success of a developer communications strategy" by our very own Rich Muir of SlashData. As mentioned, developer programs exist in many types, as different companies are marketing different types of products to developers. Ana Schafer and Christine Jorgensen of Qualcomm describe their experiences with communities around hardware in "Hardware Is the New Software - Building A Developer Community Around A Chip Instead Of An SDK". APIs are well known as a key product in DevRel so we are pleased to bring you a new chapter by Mehdi Medjaoui, founder of APIdays conferences "Developer Relations and APIs". We can't list all of the great chapters here, but we would be remiss if we didn't point out the chapters on community, the heart and soul of any leading developer relations program. Be sure to read "The Power Of Community" by Jacob Lehrbaum of Salesforce, and the new chapter "Building an Inclusive Developer Community" by Leandro Margulis, based on his days at TomTom. Andreas Constantinou, Founder & CEO, SlashData Nicolas Sauvage, President & Managing Director, TDK Ventures Caroline Lewko & Dana Fujikawa, Editors of the third edition, WIP

Dowling's Engineering Your Future: An Australasian Guide, Fourth Edition is used for first year, core subjects across all Engineering disciplines. Building on the previous editions, this text has been updated with new references, while still maintaining a strong and practical emphasis on skills that are essential for problem solving and design. Numerous topical and locally focused examples of projects across engineering disciplines help demonstrate the role and responsibilities of a professional engineer. Themes of sustainability, ethical practice and effective communication are a constant throughout the text. This full-coloured print with interactive e-text resource has a variety of digital media embedded at the point of learning such as videos and knowledge-check questions to engage students and to help consolidate their learning.
