This book examines the formation of urban neighbourhoods in the Middle East, Africa, and South Asia. It departs from 'neighbourhoods' to consider identity, coexistence, solidarity, and violence in relations to a place. Urban Neighbourhood Formations revolves around three major aspects of making and unmaking of neighbourhoods: spatial and temporal boundaries of neighbourhoods, neighbourhoods as imagined and narrated entities, and neighbourhood as social relations. With extensive case studies from Johannesburg to Istanbul and from Jerusalem to Delhi, this volume shows how spatial amenities, immaterial processes of narrating and dreaming, and the lasting effect of intimacies and violence in a neighbourhood are intertwined and negotiated over time in the construction of moral orders, urban practices, and political identities at large. This book offers insights into neighbourhood formations in an age of constant mobility and helps us understand the grassroots-level dynamics of xenophobia and hostility, as much as welcoming and openness. It would be of interest for both academics and more general audiences, as well as for students of undergraduate and postgraduate courses in Urban Studies and Anthropology.

Presents photographs and descriptions of thirty-two machines that have made significant contributions to motorcycling history

Personality (1917) contains six lectures delivered in America during Tagore's second visit there. The essays are a structured exposition of his thoughts on different subjects like 'Art', 'Reason for its Existence', 'Woman' and so on.

Beginning with an innovative way to define property, T.Collins Logan explores the moral underpinnings of civil society expressed by "the unitive principle." This principle, in turn, is applied to a method of property valuation and exchange that emphasizes well-being through community-level systems and structures. T.Collins advocates for design principles and several threads of evolution that must simultaneously occur in order to achieve a more compassionate and egalitarian political economy. This is a vision that takes root in individual moral development, and expands outward into community, regional, national and global relationships. In Political Economy and the Unitive Principle, constructive change is only possible when organic, grass roots activism coincides with top-down institutional reforms. There is considerable hope and optimism among these pages, and plentiful resources to support next steps in a more positive and productive direction. Political Economy and the Unitive Principle is a thoughtful discussion of one viable alternative to an increasingly toxic commercialist corporationism.

Every red-blooded motorcyclist dreams of making the Big Trip--this updated fifth edition shows them how. Choosing a bike, deciding on a destination, bike preparation, documentation and shipping, trans-continental route outlines across Africa, Asia and Latin America, and back-country riding in SW USA, NW Canada and Australia. Plus--first hand accounts of biking adventures worldwide.
