~~Well Control – Basic Knowledge 1 – ProProfs Quiz~~

WILD WELL CONTROL. Well Control Methods. The goal of all well control methods is to safely control the well. Circulating well control methods are often referred to as “constant bottom hole” methods as they keep BHP equal to FP preventing additional influx fluids. These methods provide for:

- Removal of kick fluids:
- o Must keep $BHP \geq FP$ to prevent additional kicks.
- o Must keep pump running at a

multiple choice problem questions. Candidates must be able to identify equipment components and operating procedures using ...

~~Drilling Well Control – IWCF~~
Classical well control is based on decades of experience from worldwide drilling operations. In the early days of offshore drilling, most wells were drilled in shallow water with simple wellbore geometries. Over the years, the boundaries of drilling have continuously been pushed towards new extremes.
