Too many of us have invested ourselves into relationships that left us deeply wounded. We've been abandoned or taken advantage of, and left with little to show for what we've given. We've lost our sense of security and personal value in the process. And what's worse, we tend to either repeat the same mistakes of judgment over and over . . . Or else lock the doors of our hearts entirely and throw away the key. Why do we choose the wrong people to get involved with? Is it possible to change? And if so, where does one begin? Drs. Henry Cloud and John Townsend offer solid guidance for making safe choices in relationships, from friendships to romance. They help identify the nurturing people we all need in our lives, as well as ones we need to learn to avoid. Safe People will help you to recognize 20 traits of relationally untrustworthy people. Discover what makes some people relationally safe, and how to avoid unhealthy entanglements. You'll learn about things within yourself that jeopardize your relational security. And you'll find out what to do and what not to do to develop a balanced, healthy approach to relationships.

An unprecedented look at college women's risks of and experiences with sexual victimization Unsafe in the Ivory Tower examines the nature and dimensions of a salient social problem—the sexual victimization of female college students today, and how women respond when they are, in fact, sexually victimized. The authors discuss the research that scholars have conducted to illuminate the origins and extent of this controversial issue as well as what can be done to prevent it. Students and other interested readers learn about the nature of victimization while simultaneously gaining an understanding of the ways in which criminologists, victimologists, and social scientists conduct research that informs theory and policy debates. Key Features Provides detailed information about sexual victimization on college campuses today Introduces broad lessons about the interactions of ideology, science and methodology, and public policy Integrates current data, research, and theory, based on the authors' national studies of more than 8,000 randomly selected female college students Intended Audience This supplemental text is ideal for courses such as Sex Crimes, Violence and Abuse, Victimology, Gender and Crime, Sociology of Violence, Sociology of Women, and the Sociology of Sex and Gender in departments of criminology, criminal justice, sociology, and women's studies. It is also useful for those involved in studying or creating public policy related to this issue and for those interested in sexual victimization on campuses generally.

The academy is in crisis. Students call for speakers to be banned, books to be slapped with trigger warnings and university to be a Safe Space, free of offensive words or upsetting ideas. But as tempting as it is to write off intolerant students as a generational blip, or a science experiment gone wrong, they've been getting their ideas from somewhere. Bringing together leading journalists, academics and agitators from the US and UK, Unsafe Space is a wake-up call. From the war on lad culture to the clampdown on climate sceptics, we need to resist all attempts to curtail free speech on campus. But society also needs to take a long, hard look at itself. Our inability to stick up for our founding, liberal values, to insist that the free exchange of ideas should always be a risky business, has eroded free speech from within.
