One of the main problems of satellite radio was addressed by the main satellite radio broadcasters. Since you need to be in the line of sight of the satellite to receive the transmission, different problems appeared with mobile satellite radio receivers, especially when different landscaping objects blocked the direct transmission. To solve this, land based devices were installed in order to eliminate the lack of direct satellite transmission. Another interesting aspect related to satellite radios is that they approached their service offers from a different perspective than traditional radio broadcasters. Instead of airing commercials they charge a subscription fee. Discover everything you need to know by grabbing a copy of this ebook today.

Child-led learning in the early years allows children to thrive while making accelerated progress. Young children learn and develop best when they are in a stimulating environment which is carefully organised and equipped to meet their needs, interests and stages of development, and where each child's progress is carefully observed, managed and enhanced by adults who engage and interact with them to support them in making outstanding progress. Demonstrating how a child-led approach supports the development of purposeful, calm, confident and independent children, The Nursery Year in Action offers a unique month-by-month overview of the workings of an outstanding Nursery setting. The book covers all aspects of practice from the organisation of the classroom and garden and the rationale behind this to the routines and boundaries that ensure children are safe, happy and therefore able to explore and learn. It tracks the events of each month in the year paying particular attention to the environment, the role of the adult, links with parents, children's individual needs and the key areas of learning and development. Throughout the book Anna Ephgrave gives the reason behind each decision and shows what the outcomes have been for the children, emphasising that a child-led approach, with planning in the moment can meet the requirements of the revised Early Years Foundation Stage and the individual needs of the children. Key features include: Over 150 full colour photographs to illustrate practice Photocopiable pages of planning sheets, record keeping sheets, sample letters to parents and play resources also available for download List of resources and materials Examples of individual learning journeys and planning in the moment for groups Guidance on what to look for when assessing children's progress Advice on risk/benefit assessments Suggestions for managing transitions and minimising stress Written by a leading consultant teacher whose Early Years' department has achieved "Outstanding" at four consecutive Ofsted inspections, this book provides practitioners with the practical ideas to work with confidence in a way that is rewarding, manageable and, above all, creates a happy, relaxed learning environment for children.

First published in 1966, and now available once more, this pioneering work examines the relationship between the Chinese civil and military authorities and the British trading community in Guangdong province on the eve of the Taiping Rebellion--one of the most calamitous events in Chinese history. The book explores the various factors that led to the progression of rebellion and the inevitability of revolution.

The term Fengshui, which literally means 'wind and water,' is the ancient Chinese art of selecting an auspicious site to provide the most harmonious relationship between human and earth. The term is generally translated as 'geomancy,' and has had a deep and extensive impact on Korean, Chinese, and other East Asian cultures. Hong-key Yoon's book explores the nature of geomantic principles and the culture of practicing them in Korean cultural contexts. Yoon first examines the nature and historical background of geomancy, geomantic principles for auspicious sites (houses, graves, and cities) and provides an interpretation of geomantic principles as practiced in Korea. Yoon looks at geomancy's influence on cartography, religion and philosophy, and urban development in both Korea and China. Finally, Yoon debates the role of geomancy in the iconographical warfare between Japanese colonialism and Korean nationalism as it affected the cultural landscape of Kyongbok Palace in Seoul.

What is this book about? JavaScript is the language of the Web. Used for programming all major browsers, JavaScript gives you the ability to enhance your web site by creating interactive, dynamic, and personalized pages. Our focus in this book is on client-side scripting, but JavaScript is also hugely popular as a scripting language in server-side environments, a subject that we cover in later chapters. What does this book cover? Beginning JavaScript assumes no prior knowledge of programming languages, but will teach you all the fundamental concepts that you need as you progress. After covering the core JavaScript language, you'll move on to learn about more advanced techniques, including Dynamic HTML, using cookies, debugging techniques, and server-side scripting with ASP. By the end of this book, you will have mastered the art of using JavaScript to create dynamic and professional-looking web pages. Here are a few of the things you'll learn in this book: Fundamental programming concepts Comprehensive practical tutorial in JavaScript Cross-browser scripting, including Netscape 6 Cookie creation and use Plug-ins and ActiveX controls Dynamic HTML Scripting the W3C DOM Server-side JavaScript with ASP Who is this book for? This book is for anyone who wants to learn JavaScript. You will need a very basic knowledge of HTML, but no prior programming experience is necessary. Whether you want to pick up some programming skills, or want to find out how to transfer your existing programming knowledge to the Web, then this book is for you. All you need is a text editor (like Notepad) and a browser, and you're ready to go!
